Summary

Full-Stack Software Developer with 5+ years of experience building scalable mobile and web applications serving 20,000+ users and processing \$800K+ in monthly sales. Proven track record delivering impactful solutions including AI-powered sales automation pipelines, multi-platform payment systems, and award-winning developer tools. Expert in React-Native, AWS, and payment integrations (Stripe, Clover, Square), with a business-focused mindset that consistently drives measurable revenue growth. Seeking to leverage technical depth and entrepreneurial experience at a dynamic company.

Professional Experience

Full-Stack Software Developer (AI and Revenue Systems)

Jan. 2025 – Present

Hinbor / Gen-Z Kiosk

Vancouver, BC

- Developing automated personalized campaign marketing systems specializing in sales solutions for merchants
- Built automated sales data ingestion pipeline to searchable insights for 100+ vendors and 50K+ orders per month
- Reduced payment processing delays by 99% (10+ minutes to seconds), significantly decreasing cart abandonment
- Launched new revenue stream and eliminated manual monthly payout processing of \$200K+ with Stripe Connect
- Optimized AWS infrastructure monthly spending by 59% through shared-infra restructure for several microservices

Full-Stack Software Developer (Platform and Payments)

Aug. 2021 – Jan. 2025

Hinbor

Vancouver, BC

- Built mobile applications serving 20K+ users, processing 50K+ orders and \$800K+ sales per month
- Integrated Clover payment, growing monthly transaction volume by 500% from \$17K to \$110K within one year
- Doubled merchant acquisition by launching custom Stripe US, Square, and Clover marketplace payment solutions
- Streamlined cloud infrastructure by splitting monolith into specialized services, improving deployment cycles
- Migrated database to scalable single-table design with efficient access patterns for growing merchant and user base

Contract Experience

Full-Stack Web Developer

May 2025 – Present

Henry's Badminton Club

Surrey, BC

- Built court booking platform managing 300+ members and \$25K+ annual revenue, digitalizing manual operations
- Developed admin dashboard with user management and event scheduling, eliminating manual booking processes
- Implemented real-time booking system with waitlisting, capacity management, and cancellation policy enforcement
- Created dual membership system for club members and drop-in users with credit-based payment tracking

Notable Projects

Tickit (BCIT Hack the Break - Best Terminal Award) | Conversation to Jira Ticket Pipeline

Mar. 2026

- Automated team workflow from Slack conversations to Jira tickets, reducing manual ticket creation time by 95%
- Built AI agentic system that structures discussions into organized project hierarchies with epics, stories, and tasks
- Enabled automatic code generation from tickets to pull requests, streamlining feature development lifecycle
- Implemented automated historic space data ingestion pipeline to optimize future ticket creation and design

NFCMon (SFU Sillyhacks - Most Creative Idea Award) | Physical Pokémon Card Web Game

Apr. 2026

- Built IoT game bridging NFC-tagged Pokémon cards to a web application for real-time digital spectation

Technical Skills

Frontend: React-Native (5y), React (5y), Redux (5y), TypeScript (5y), Next.js (1y)

Backend and Cloud: AWS (5y), Serverless (5y), Node.js (5y), Firebase (3y)

Payment Systems: Stripe (5y), Clover (3y), Square (3y), Stripe Connect (1y), Adyen (1m)

Dev Flow, DevOps and CI/CD: Jest (5y), GitHub Actions (3y), Claude Code (1y)

Education

British Columbia Institute of Technology

Bachelor of Science in Applied Computer Science, Wireless and Mobile App Development

Diploma in Computer Systems Technology, Data Communications

Burnaby, BC

Jan. 2026 - Apr. 2029

Sep. 2019 - Apr. 2021
